• Panel Specifications
Typical GE Profile DW panel style

**Dishwasher**
"Framed" (1/4")

Typical "Framed" Dishwasher panel. This is a 3/4" thick door with 1/4" thick trim around all sides. There is a 2 1/2" reveal at the bottom and 1/2" on all other sides.

The bottom access panel is always 1/4" flat material.

NOTE: This panel is sometimes a different width than the top panel.
**Dishwasher**
"Overlay NO Routing" (3/4")

*Typical GE Monogram DW panel style*

3/4" Thick door

"Overlay Door" 3/4"

Typical "Overlay" Dishwasher panel. This is a 3/4" thick door
Dishwasher - Drawer & Door
"Overlay NO Routing" (3/4")

When a DW spec is calling for a varying overall height so you can match the height of cabinets on either side you have two options for Vassar House and one option for Carriage House...

...with VHS you can either order a drawer head attached to a door or a full height door. With CHS you can only order a full height door. Either way you want the panel to equal the height of a standard 30” VHS or CHS door.

Most common brands that require a panel to match the doors on the cabinetry:
Bosch, Meile, Asko

Common "keyword" in specs indicating this type of panel:
"Integrated"
**Appliance Panels : Panel Specifications**

**Dishwasher - Drawer & Door**

"Overlay NO Routing" (3/4")

— **Typical Bosch Drawer/Door DW panel spec**

For all Integra SHV Dishwashers:

SHV panel thickness: ¼"  

SHV panel weight: min. 9 lbs. - max 21 lbs. Toe-kick height from 4" to 7".

Important: Handles are not supplied with SHV dishwasher.

**SHV installation:**

Panel dimensions - integrated models. The height and width of the panel door will equal the height and width of a single door for a 24" base cabinet front (door and drawer head). For custom-made panels and framed cabinet styles, a 33-3/8" width is recommended.

**One-Piece Cabinet Panel Installation**

The minimum height for the one-piece cabinet panel is 27-1/4". The maximum height for the one-piece cabinet panel is identical to the height of the adjacent cabinet front from the bottom of the countertop to the bottom of the cabinet door. (Leave ¼" space between countertop and dishwasher).

**Two-Piece Cabinet Panel Installation**

The minimum height for the drawer head panel is 3". The maximum height for the drawer head panel is identical to the height of the adjacent cabinet drawer head height. The minimum combined height for the lower door panel and the upper drawer head panel is 27-1/4".

The maximum combined height for the lower door panel and drawer head panel is identical to the height of the adjacent cabinet front from the bottom of the countertop to the bottom of the cabinet door. (Leave ¼" space between countertop and dishwasher).

— **Typical Asko DW panel spec**

The D3250FI and D3530FI can only be installed with a fully-integrated custom door panel that extends from the toe kick to the countertop. The unit comes with everything needed to make installing the door panel easy. The door is predrilled for the panel's mounting screws.

The custom panel can be a minimum of 1/4" (6 mm) thickness to a maximum of 3/4" (19 mm) thickness.

If a DW spec offers different toe kick height arrangements, always refer to the 4" toe kick spec.

**CUSTOM PANEL DIMENSIONS**

Width: 23 1/2" (597 mm)  
Height: 28 1/8" - 30 1/8" (714 mm - 765 mm)  
(Measured from the top of the panel to the lower edge of the kitchen cabinet.)

Thickness: 1/4" (6 mm) to 3/4" (19 mm) max

Weight: Up to 22 lb.

**NOTE:** Specifications subject to change without notice.

**NOTE:** Heavy-duty door springs can be purchased for wooden door panels weighing over twelve pounds. (P/N 8071323-77)

Appliance Panels: Panel Specifications

Dishwasher - Double Drawer
"Overlay NO Routing" (3/4")

Most Manufacturers supply the exact panel sizes needed

**GE Monogram Double Drawer Refrigerator**
This would be an example of "Overlay Special Routing"

Take note of dimensional difference between overlay size and backer size: 
3/8" difference for HEIGHT 
7/16" difference for WIDTH

**Kitchen Aid typical Double Drawer Dishwasher**
This would be an example of "Overlay No Routing"

Always be sure to inform your customers that we can not cut out for "medallion" area on any panel

Dishwasher - Double Drawer
"Overlay NO Routing" (3/4")

**Typical Fisher & Paykel Double Drawer Dishwasher**

The Door and Toe Kick Panels of the DishDrawer® can be made to match your kitchen cabinetry. This diagram, with the addition of your own measurements will help you calculate the required panel sizes.

**CABINETRY ALIGNMENT**

The following calculations assume:

The top of the Upper Panel is to be aligned with the top of the adjacent cabinetry. The final panel/cabinetry alignment is achieved by adjusting the DishDrawer®'s feet.

### WIDTH OF ALL PANELS

Measure the width between adjacent door/drawer fronts and write it in the first box below, then complete the equation. For example:

- **A** 24 1/8" (616mm) - 2 x 1/8" (2.5mm) = 23 3/4" (61 mm)

### HEIGHT OF LOWER PANEL

Measure the door/drawer height (or equivalent) and write it in the first box below, then complete the equation. For example:

- **A** 29 13/32" (762mm) - 15 5/8" (398mm) - 5/16" (8mm) = 13 17/32 (355mm)

**Note:** The 'Door Extension' (C) allows for the top of the Upper Panel to be above the DishDrawer® where required.

**Important!**

The air vent between the Upper and Lower Panels must not be covered. An air gap of 1/4" (9mm) MUST be provided.

### HEIGHT OF UPPER PANEL

For example:

- **A** 15 5/8" (398mm) + 0" (0mm) = 15 5/8" (398mm)

Use same calculation for top drawer in either VHS or CHS doors. However use different formula for the lower drawer.
Dishwasher - Double Drawer
"Overlay NO Routing" (3/4")

**Typical Fisher & Paykel Single Drawer Dishwasher**

The Door of the DishDrawer® can be made to match your kitchen cabinetry. This diagram, with the addition of your own measurements will help you calculate the required panel sizes.

**WIDTH OF THE PANEL**

Measure A. the width between adjacent door/drawer fronts and write it in the first box below, then complete the equation.

For example: (A) 24 1/2" (618mm) − 2x 5/16" (2.5mm) = 24 1/8" (611mm)

**HEIGHT OF THE PANEL**

Measure B. door/drawer height (or equivalent) and write it in the first box below, then complete the equation.

For example: (B) 16" (407mm) − 3/8" (9mm) = 15 5/8" (399mm)

**Note:** When the top of the DishDrawer® lies to be lower than the adjacent cabinetry, the Panel can be increased in height.

**WARNING!**

The air vent between the Panel and the adjacent cabinetry must not be covered. An air gap of 9/32" (7mm) MUST be provided.

Use same calculation for the panel width as the double drawer panel.
Suggest to use the same height drawer as the standard height of the double drawer above. This can be used for VHS or CHS product.
Refrigerator - Side by Side
"Framed" (1/4")

Example - "Side by Side" refrigerator

1/2" Reveal on top, bottom and side

2 1/2" Handle reveal

Framed panels have a 1/4" thick backer with an "overlay" door integrated with it. This will allow for a "reveal" on all sides to fit into a trim kit and leave clearance at the handle for operating.

"Framed" Code in AS400 will automatically calculate for the reveal on all sides of the panels. Always key in the overall dimensions shown in the specs (Example next page)

1/4" Thick trim around all sides of door

2 1/2" Profile of "Framed Panel"

1/2"
Refrigerator - Side by Side
"Framed" (1/4")

Example of typical GE Profile Side by Side spec

NOTE:
Always be sure to clarify with your customer if they are getting a dispenser or not.

This is the typical information you will find in the spec pages. It is saying that the maximum thickness is 1/4". This is what a FRAMED appliance panel will have on all sides to fit into the trim kit.
"Overlay NO Routing" (3/4"

“Overlay NO Routing” panels are a 3/4" thick custom size door. They are typically seen on Ref. over Freezer appliances freezer drawer at the bottom.

Example - "Refrigerator over Freezer"

Profile of "Overlay NO Routing" Panel

3/4"
**Refrigerator - Refrigerator over Freezer**

"Overlay NO Routing" (3/4")

"Overlay NO Routing" panels are a 3/4" thick custom size door. They are typically seen on Ref. over Freezer appliances like the SubZero 700 series with the freezer drawers at the bottom.

Example - "Refrigerator over Freezer drawers"

"Overlay NO Routing" Code in AS400 will automatically build panels to exact size entered with no reveal. Always key in the "OVERLAY" dimensions shown in the specs (Example next page)

Profile of "Overlay NO Routing" Panel

Example - "Refrigerator over Freezer drawers"
Refrigerator - Refrigerator over Freezer
"Overlay NO Routing" (3/4")

Example of typical GE Refrigerator

- Using Trim Kits ZKTC36L or ZKTC36R 3/4" thick panel with kit supplied handle.

Custom Door Panel Dimensions

ZIS36N Bottom Mount Refrigerator

- The ZKTC36L (or ZKTC36R) trim kit provides for the installation of 3/4" thick custom door and grille panels, using the supplied handle. Cut panels to size and install.

Always be careful to clarify which handles are being supplied because it could affect the panel sizes.
Refrigerator - Refrigerator over Freezer
"Overlay NO Routing" (3/4")

Example of typical SubZero 700 Series Refrigerator (shown available in 27" or 36" width appliance)

CAUTION:
Always be sure to use the Overall sizes noted - not the drilling details to the left because this page is also showing how to attach the panel to the appliance

For drawer only undercounter units use the dimensions shown for just the 2 drawers
Refrigerator - Side by Side
"Overlay WITH Routing" (3/4"

"Overlay With Routing" panels are a 3/4" thick custom size door with a routing detail around all sides of the door to act as the "spacer" and "backer" panels.

"Overlay WITH Routing" Code in AS400 will build the panels to exact size entered with no reveal. Always key in the "OVERLAY" dimensions shown in the specs (Example next page). HOWEVER details regarding the routing dimensions may need to be submitted to ensure proper fit.

Overlay Spacer Backer

See Illustration 12 & 13 next page
Refrigerator - Side by Side
"Overlay WITH Routing" (3/4")

Example of typical Overlay WITH Routing Refrigerator

Key In Overlay dimensions on your order

- Spacer Panel
- Overlay Panel
- 10" (6) or Backer Panel
- 9 1/4" or Backer Panel

For grille panel size, use width dimensions listed for your model and height dimensions for grille option. 11" (279) grille is standard.

Panel grille is available for all overlay units except Models 601R, 601RG, and 601F.

Whenever you see 3/4" Thick panels indicated in your panel specs, that is the clue that you need to either use Overlay WITH or NO Routing. Most SubZero's work with our "WITH Routing" code but some MFG's require special details. See "Special Routing Details" pages for more info.
Refrigerator - French Doors
"Overlay WITH Routing" for French Doors Style (3/4")

"Overlay WITH Routing" for French Door style Refrigerators are a 3/4" thick custom size door with special routing placement. The Refrigerator gets routed on the Top, Bottom and NON-hinge sides. The Freezer gets routed on all 4 sides.

Example - "French Door style Refrigerator"

"Overlay NO Routing" Code in AS400 will automatically build panels to exact size entered with no reveal. Always key in the "OVERLAY" dimensions shown in the specs (Example next page)

Profile of "Overlay WITH Routing" Panel for French Door Ref.

Overlay Spacer Backer
NOTE: Although routing detail will show thru on the Handle side, the bottom of the trim kit covers the routed detail that would be seen from the handle side.

Example of Viking French Door refrigerator to accept appliance door panels. Metal Trim kit surrounds top, bottom and NON-handle side of the refrigerator doors and all 4 sides of the Freezer door.

Photo courtesy of Ron Barkman Sr. at Home Appliance Center Malvern, PA

View of handle side of refrigerator door. Routing detail is not applied on the handle sides of the panels.

Photo courtesy of Ron Barkman Sr. at Home Appliance Center Malvern, PA
**Refrigerator - Side by Side with Dispenser Cutout**  
"Overlay WITH Special Backer (3/4" + 3/8")

"Overlay WITH Special Backer" are a 3/4" thick custom size overlay door with a true backer and spacer panel applied to the back to accommodate special dispenser cut outs.

**Profile of "Overlay WITH Special Backer"**

- Overlay = 3/4"
- Spacer = .10"
- Backer = 1/4"
- 1.10"

**SubZero with GLASSWELL cutout**  
i.e.: 685 & 695

Example - "Side by Side" with dispenser cut out on Refrigerator Door

See Illustration 12 & 13 next page.
Refrigerator - Side by Side with Dispenser Cutout
"Overlay WITH Special Backer (3/4" + 3/8")"

Example of typical Overlay WITH Special Backer for Refrigerator with Dispenser cut out

Refer to these dimensions to calculate exact panel sizes

Glasswell cutouts will require that you order a 3/4" thick SLAB piece for installer to cut dispenser opening. This piece will be assembled with the other custom panels for the Refrigerator door.

See next page to calculate SLAB piece size as well as doors above, below and next to Glasswell

For grille panel size, use width dimensions listed for your model and height dimensions for grille option. 11" (279) grille is standard.

Panel grille is available for all overlay units except Models 601R, 801RG and 601F.

See note on next page to enter Grill Panel
Refrigerator - Side by Side with Dispenser Cutout
"Overlay WITH Special Backer (3/4" + 3/8")

Calculating Glasswell SLAB panel size

To calculate SLAB width take the "E" overlay dimension x 2
1 11/16 x 2 = 3 3/8
Plus the Cut out dimension width of 5 7/8
3 3/8 + 5 7/8 = 9 1/4
9 1/4" is the width of the 3/4" SLAB

To calculate SLAB height take the overlay Cut-Out dimension Plus "E" dimension x 2
12 7/16 + 3 3/8 = 15 13/16
15 13/16" is the height of the 3/4" SLAB

Add item to panel order

Use Panel-Appl__ program to add this SLAB piece
Panel Group: Side by Side
Panel Reveal: 3/4" Finished Slab
Appliance MFG: SubZero
Appliance Type: Glasswell
Model Number: 695

Width Height Panel Type Price Need Drawing Y/N MFG
9 1/4 15 13/16 Leave Blank 320.00 Y SUB

Mark with "SUB" MFG code to tag as Subcomponent so plant will look for this piece to assemble with REF and FREEZER pieces

Make sure to indicate "Y" when it is an ASSEMBLY piece
Refrigerator - Side by Side with Dispenser Cutout

To calculate the lower Glasswell door panel (marked 2)
- **W** The width will match the SLAB of 9 1/4"
- **H** Take the total height of "F" 28 3/4" less 1 11/16" = 27 1/16"

**Bottom REF panel is 9 1/4" x 27 1/16"**

To calculate the upper Glasswell door panel (marked 1)
- **W** The width will match the SLAB of 9 1/4"
- **H** Take the total height of the REF door 68" less the SLAB 15 13/16" less the lower door 27 1/16"

**Upper REF panel is 9 1/4" x 25 1/8"**

To calculate the Full Length Door to the right of the Glasswell (marked 3)
- **W** The overall width of the panel is 28" less the 9 1/4" door above the glasswell = 18 3/4"
- **H** The height is exactly the same as the standard spec detail = 68"

**Full Length REF door is 18 3/4" x 68"**

FREEZER & GRILL panels are entered exactly as shown above using OVERLAY dimensions.

"Component" will

"Overlay WITH Special Backer (3/4" + 3/8")"

Example of typical Overlay WITH Special Backer for Freezer with Dispenser cut out

GE Monogram with Dispenser cutout on Freezer Door

Use same technique as Refrigerator dispenser cut out to calculate dimensions of SLAB piece and door for above and below.
Always add approx. 2" to SLAB piece height to allow for about 1" reveal at the top and bottom of the cut out.
...Make sure to deduct from the doors above and below.

Follow same AS400 directions as Refrigerator side cut out.

48" GE Monogram refrigerators do not require a slab for the dispenser location. Typically the cut out will fit on to the center panel of the door.

- Zero clearance with a flush/flat door panel.
- Door will accept a raised panel. Allow proper clearance, on hinge side when installing a raised panel. Amount of clearance will depend on raised panel thickness.
- The maximum panel thickness when inserted into the door reveal (channel) is 1/4" thick.
- For raised panels the depth of the reveal is 1/4" on both sides and bottom and 1/2" on top.
- Panel not to exceed 20 pounds.
There appears to be 3 different possible details that may be needed for the "Frame Only" panel frame. This varies by manufacturer.

1. Calls for the back and side of the frame to be flat without any detail on it. OR
2. For routing typical of the SubZero style routing (see overlay with routing REF pages for details) OR
3. For routing on the back of the frame instead of the sides to allow it to lay flat against the glass frame on the appliance

Typical Frame Only that does not require any routing detail

Use "Overlay No Routing" code on your order

Example From:
Marvel 24" Designer Door

Typical Frame Only that requires routing detail on the sides of the frame

Use "Overlay Special Routing" code on your order

Example From:
SubZero 430

Typical Frame Only that requires routing detail only on the back of the frame

Use "Overlay Special Routing" code on your order

Example From:
U-Line 2175 & 2115
"Frame Only"
"Overlay NO Routing" or "Overlay Special Routing" (3/4")

All "Frame Only" panels will be "filled" in as shown below, further routing detail "Overlay no Routing" or "Overlay Special Routing" will depend on the MFG specs that are provided. See details below.

Known exceptions for MFG of frame only panels

Several *Kitchen Aid* models require a wider Rail (3 3/4") than Stile (1 3/4"). Because you can’t miter that frame correctly, Century will not be able to MFG frames with these requirements using a Door Rail. A Slab Filler piece will have to be used to make this type of frame.
"Trash Compactor / Compact Fridge / Wine Cooler"
"Framed" (1/4")

**Trash Compactor**
Typical "Framed" Trash Compactor panel. This is a 3/4" thick door with 1/4" thick trim around all sides. There is a 2 1/2” reveal at the Top and 1/2” on all other sides.

**Compact Refrigerator Handle on Top**
Typical "Framed" Compact Refrigerator Handle on Top panel. This is a 3/4" thick door with 1/4" thick trim around all sides. There is a 2 1/2” reveal at the Top and 1/2” on all other sides.

**Compact Refrigerator Handle on Side**
Typical "Framed" Compact Refrigerator Handle on Side panel. This is a 3/4" thick door with 1/4" thick trim around all sides. There is a 2 1/2” reveal at the Top and 1/2” on all other sides.
**Entering "Trash Compactor" or "Compact Ref..." in AS400**
